Professional Experience

Total Experience: 2 years 6 months

Gemini Solutions Pvt. Ltd, Software Engineer L2

Jan 2022 – Present

- Jointly developed **micro-service FE** for a major General Insurance provider, maintained **large-scale** web applications using core web-development principles, for **efficient data management** across all LoBs, supporting high-volume transactions.
- Built user-friendly interfaces streamlining complex workflows till policy issuance, emphasizing Lazy loading, code splitting, state management, optimal change detection strategies, to **decrease initial load times** by **35%**. (via Google Lighthouse)
- Utilized agile SDLC and FE sanity checks to successfully cater to 20+ diverse insurance products across various LoBs; Delivered integration of over 7 new bank partners, resulting in an anticipated **growth** of **client revenue** by over **\$1M** YoY.
- Collaborated on leveraging AWS services (Lambda, EC2, S3) for serverless functionality and scalable infrastructure, **enhancing front-end** interactions by **reducing server load** and optimizing performance.

Chandigarh Angels Network, Operations Analyst (Internship)

Sept 2021 – Jan 2022

- Evaluated pitch decks to select startups for monthly Demo Days, fostering crucial connections with founders and investors.
- Automated email systems and newsletters using custom scripts in Google Workspace and MailChimp, managed WordPress website updates, and crafted investment mandates.
- Produced compelling marketing content across various platforms, enhancing brand visibility and engagement.

Projects

Agent Portal (client)	<ul style="list-style-type: none">IPDS V2 is a cloud-based, mobile-compatible platform that allows for core system integration, underwriter work-flows, and enhanced controls. It provides a more complete solution for agents, bank partners and internal stakeholders. This platform replaces Legacy system being used for over a decade.Tech: Angular, RxJx, Material UI, Bootstrap, AWS Lambda
Online delivery platform (internal)	<ul style="list-style-type: none">This application aims to deliver milk and related grocery products to the customers on demand or subscription basis viz daily, weekly, monthly or custom date. The project includes 3 verticals: Customer app to place orders, Delivery app to drop orders, and Admin view to manage agents and orders.Tech: Flutter, React JS, Node JS, AWS Lambda functions
Job Portal Link	<ul style="list-style-type: none">React-based job listing project demonstrates efficient state management, API calls, and reactive forms. Users can post new jobs or browse existing listings, providing a dynamic and interactive experience.Tech: React JS, Tailwind CSS, Vite, mock back-end

Academics & Achievements

Year	Degree	Board / University	CGPA
2018-2022	B.E. (Electronics and Communication)	UIET, Panjab University, Chandigarh	7.78

- Academic Projects** - Contributed to ESP32-based *bionic arm research* using EEG/EMG sensors at DIC (MDaRT), Panjab University, which secured a patent and DST-SERB grant. [Link](#)
- Rewards & Recognition** - GEM of Gemini - Commitment Award (Q3, 2023 - 2024)
- Certifications** - Meta Front-End Developer Professional Certificate (*Meta*), Namaste Javascript (*NamasteDev.com*)

Positions of Responsibility

- Member - L&D team, Gemini Solutions: Conducted HTML/CSS Bootstrap sessions for trainees
- Team Lead - Student Alumni Relations Cell, UIET, Panjab University (2019-2021)

Extra-curricular

- 2nd Runners Up:** Street Play, IIT Kharagpur (2019), 50th Haryana Interstate Football Tournament (2015)
